

FRESHERS TASK 2

REQUIREMENTS:

- Install Android Studio https://youtu.be/YV4i_ksoe-Q

STATEMENT

1. Watch and implement the task in the above tutorial to get used to the interface and then proceed on to make the following app in **JAVA**.
 2. The launching activity will have two editable textviews, with hints for entering name and your roll no. And a button saying “Enroll”.
 3. Add a toast indicating the successful entry of the data.
 4. Clicking the button will take you to another activity called activityWelcome which will have a beautifully decorated XML Layout and a personalised welcome message inculcating the inputs entered in the Main Activity. For eg, if the input entered in the launching activity were Name: Vedant and Roll No. 19IE10032. The message in the welcome activity could be “19IE10032 successfully enrolled. Welcome Vedant”
- Feel free to explore and add further interactive features to the app and shine out among your teammates.
 - Use a nice icon and a theme of your choosing for the app.
 - Host this project on github and submit the **repo link on google forms** and share the **apk in the WhatsApp group**.
